

DUBLIN METRO

Supporting a vibrant digital ecosystem at the heart of the fastest growing economy in the EU, with diverse connectivity options to Europe and the USA

A fast-growing economy, tech-savvy workforce and dynamic nature have turned Ireland into one of the world's great commercial hubs. The country's pro-business environment has also transformed it into a successful incubator for innovative start-ups, further fueling Ireland's growth. At the center is Dublin, the European home to major global companies including Google, Facebook, PayPal, Dropbox, AirBnB, LinkedIn and Salesforce. All of these factors have created a huge demand for data centers, and Equinix is leading the charge.

Equinix helps companies accelerate business performance by connecting them to their customers and partners inside the world's most networked data centers. Our Dublin **International Business Exchange™** (IBX®) data centers are business hubs for 210+ companies. Customers can choose from a broad range of network services from 60+ local and international providers, in addition to a number of diverse and rapidly growing international business clusters. They can also interconnect with a rich industry ecosystem of financial services organizations, internet and cloud service providers, content and digital media companies and major global enterprises.

Dublin metro facilities

The four Dublin-based IBX facilities are ideally situated along the T50 underground fiber optic telecommunications ring, which circles the city and serves as the primary route for the metro's main electrical power sources. Equinix Dublin provides a total colocation space of 145,000+ square feet (13,525+ square meters) within the state-of-the-art data centers. They also offer scalable technical space, leading operational resiliency and world-class security.

The value of interconnection

- Interconnect with 210+ of the world's leading organizations
- Optimize communications and exchange data with enterprises, and content providers, as well as cloud, network and internet service providers
- Enable next-generation wide area network (WAN) architecture through a **Performance Hub™** deployment
- Connect directly and securely to 60+ network service providers and 60+ cloud and IT service providers
- Connect to the Internet Neutral Exchange (INEX), one of the world's largest internet exchanges, with 100+ members from across Europe. INEX is housed in two Equinix data centers, offering our customers the benefit of low-latency connectivity
- Connect directly to some of the world's largest financial services organizations
- Easily meet compliance requirements, now and in the future. Our Dublin IBX data centers are highly accredited, and include ISO 27001 (security management), ISO 22301 (business continuity management) and PCI DSS (card payments specific accreditation) certifications
